

# Building Partnerships in Clean Tech

DAVID KENNEY, SCE PIKE, BEN STAPLETON, STEPHANIE YANCHINSKI

# Oregon BEST

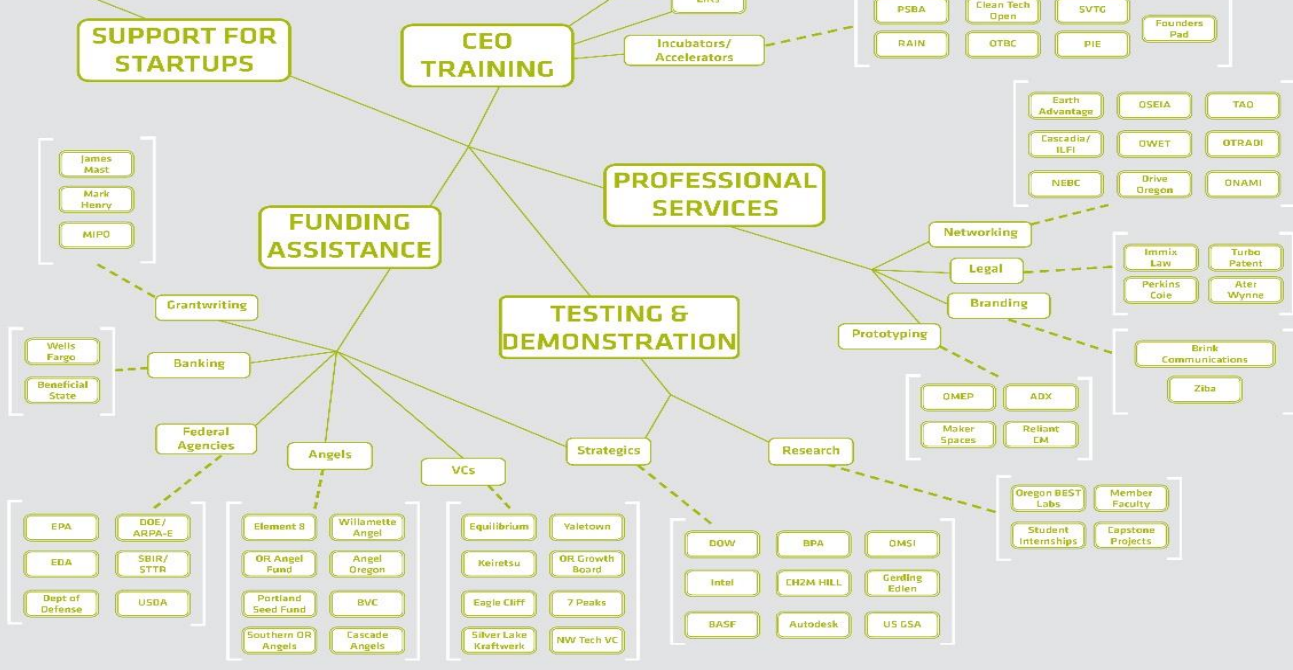

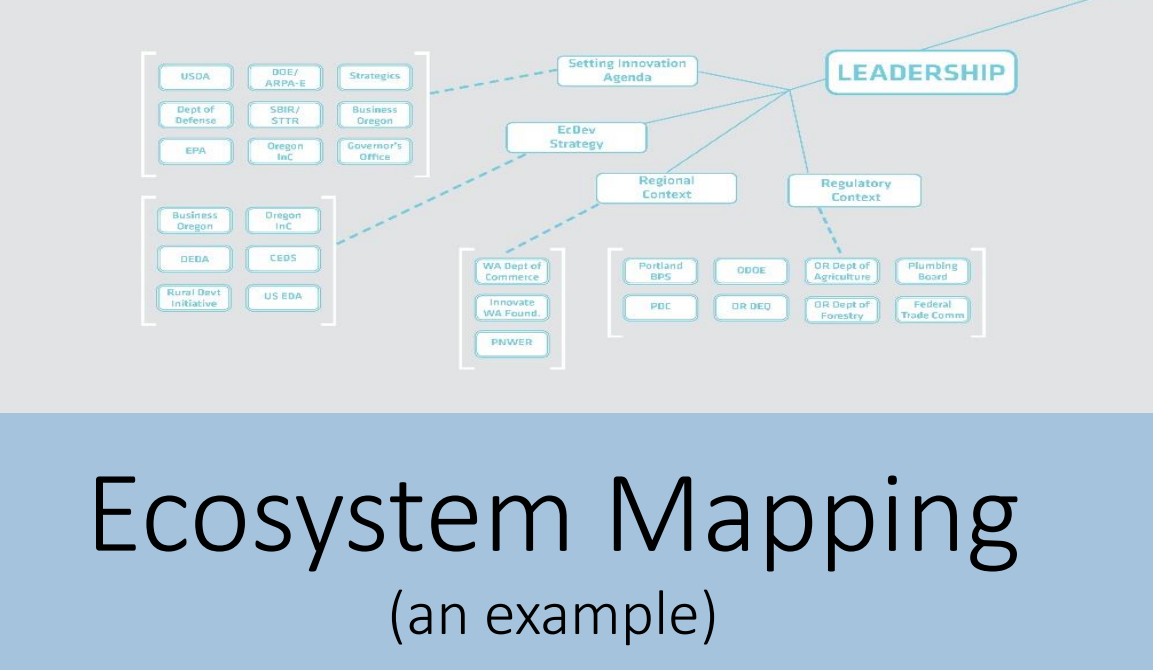

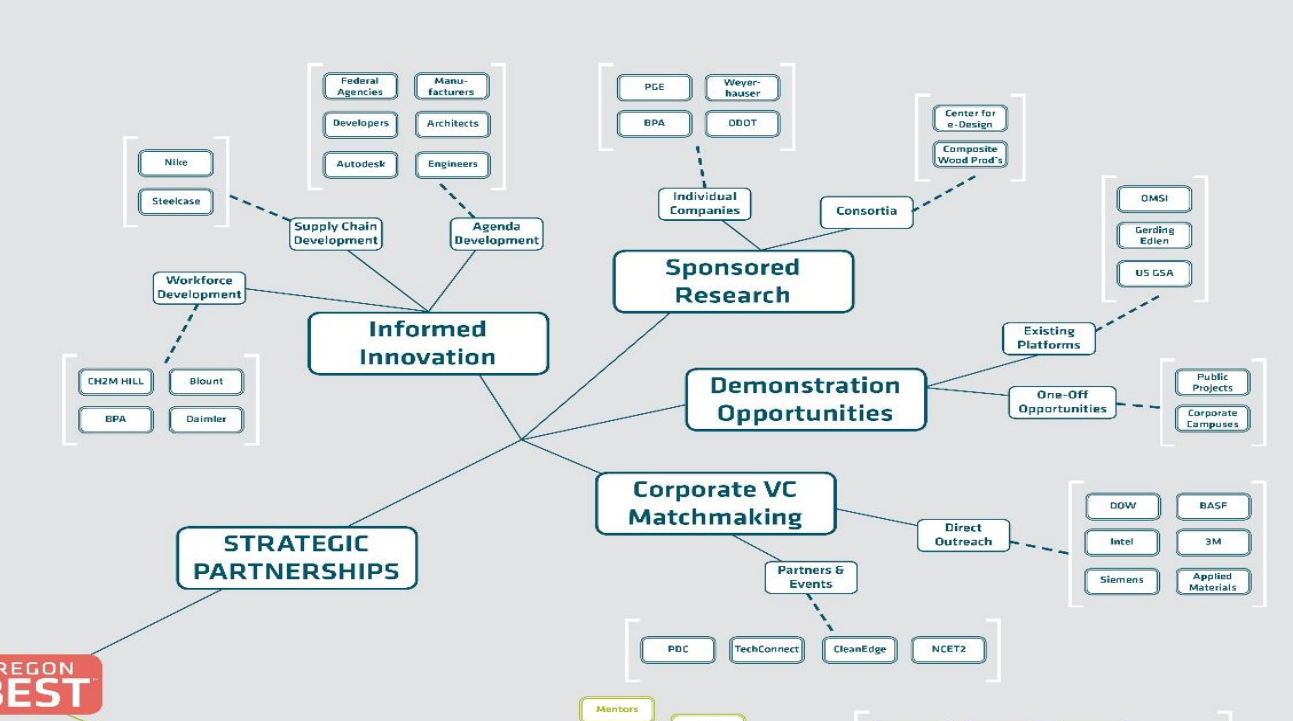

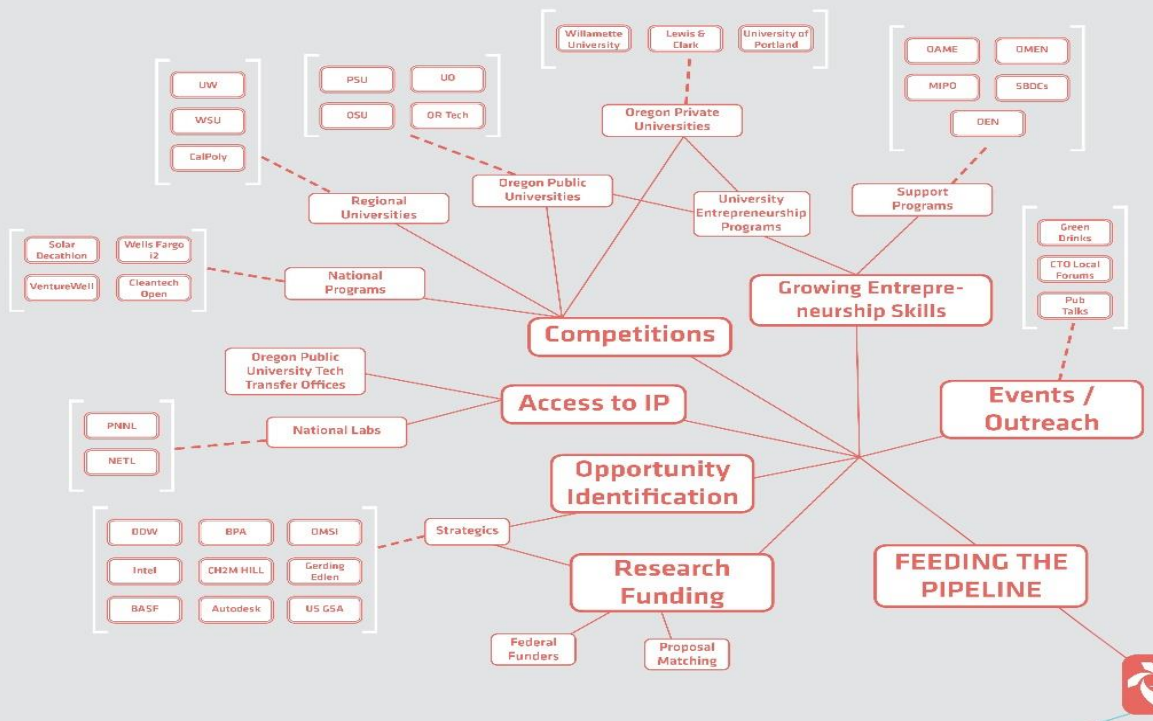

- Nonprofit supporting cleantech startups in Oregon
- Funding
  - Access to state commercialization funding
  - Assistance pursuing SBIR/STTR funding
  - Connections to angel, VC, corporate, impact investors
- Support
  - Entrepreneur-in-residence coaching
  - Connections to technical resources (expertise & lab equipment)
  - Five month accelerator program (curriculum & mentoring)
  - Manufacturing scale-up assistance
  - Funded internships
  - National event showcasing
- Oregon BEST FEST in September

# Today's Scope: Cleantech startups and ecosystem partnerships

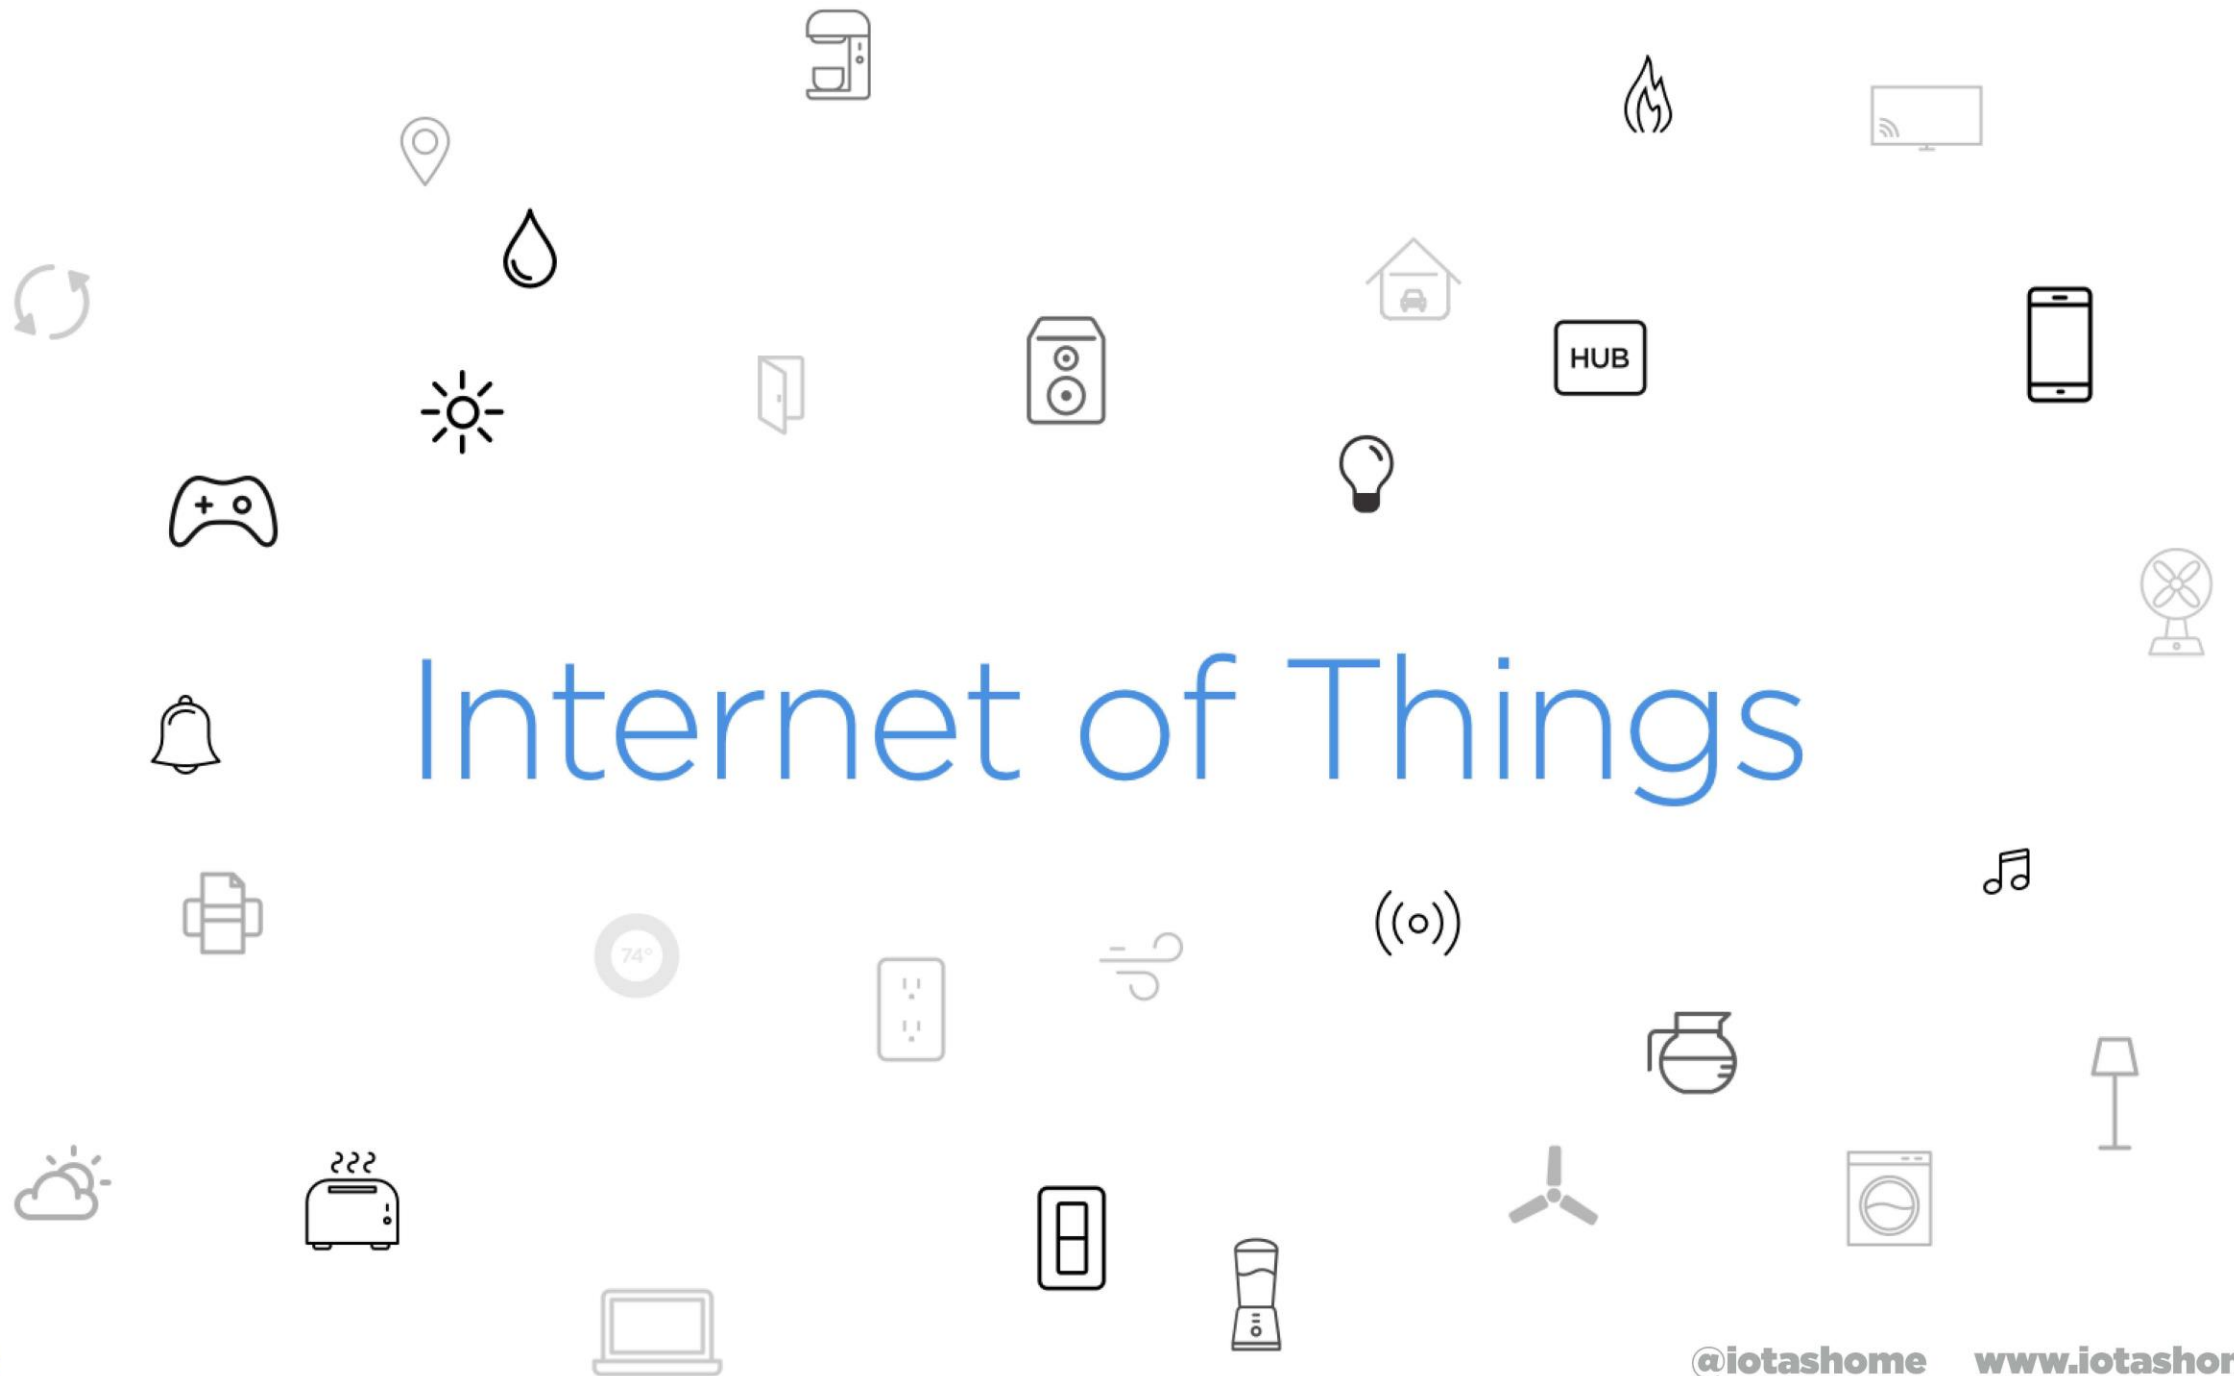

- Partnerships focusing on:
  - Startups
  - Utilities
  - Corporate partners
  - Customers
- Topics for discussion:
  - Value proposition
  - Funding models
  - Tips for successful collaborations
  - Challenges/pitfalls
  - Changing environment (political & otherwise)

Ecosystem Mapping  
(an example)

# Internet of Things

**20 Billion** devices will  
be connected by 2020

# Challenges

---

## **Why is IoT a challenging field?**

- Software? Hardware? Both?
- A technology that has had setbacks
- Lots of 'parts' - it takes a village
- Maintenance
- We have targeted a very specific audience

# IoT in the **Home**

# Opportunities

---

- 1. Save \$ on utility bills**
- 2. Peace of mind**
- 3. Comfort and convenience**
- 4. Crowd sourced rules**
- 5. Machine learning**

# Social impact when an apartment autosaves energy

Potential energy savings of an IOTAS installed apartment = **6.74 kWh/sq.ft-yr**

18M apartments = 17.7B sq.ft

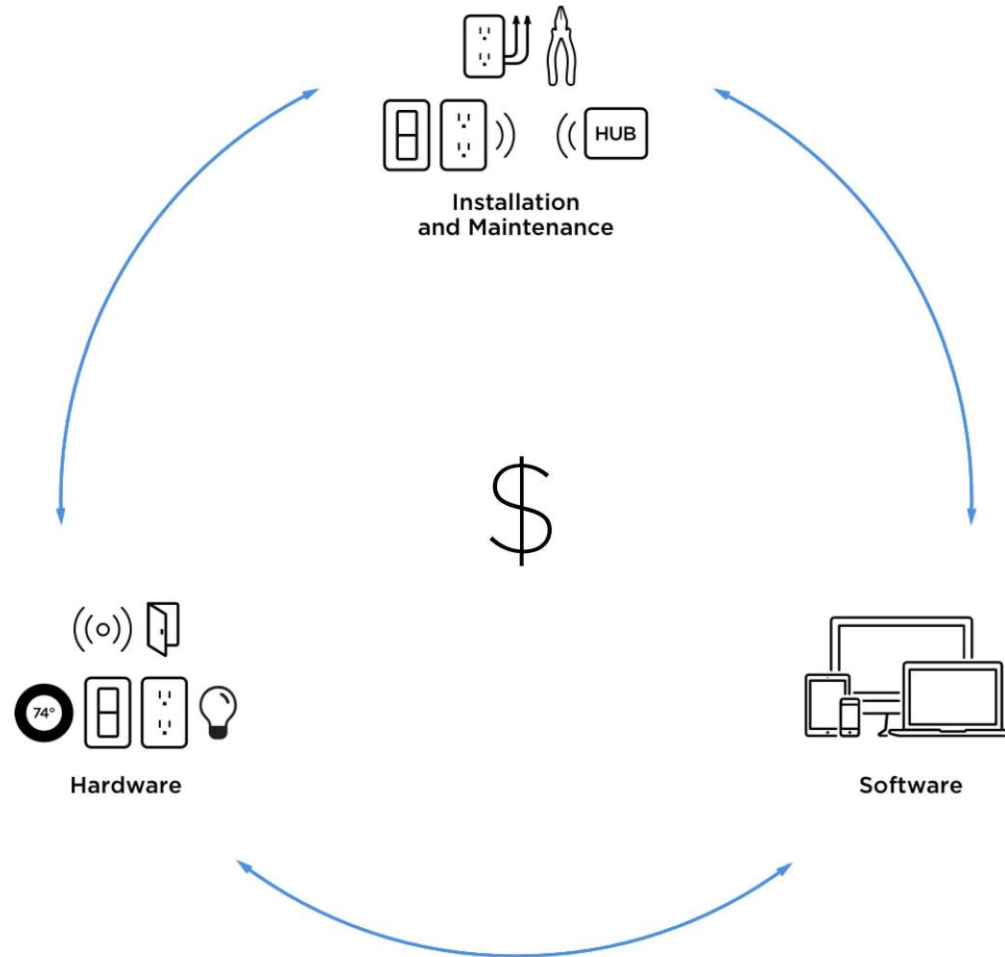

17.7B sq.ft x 6.74kWh = **119,136 GWh/yr** or **~\$7.3B** in Potential Savings

Which is equivalent to:

# Difficulties of IoT in the Home

---

# IoT in the **Community**

DRY CLEANING  
*Express*

107 - 111 Fleet Street  
London EC4A 3DF  
Office & Meeting Rooms

Ludgate Hill

TALU

ITALIA

# Opportunities

---

## 1. Public health and safety

- Improve emergency services
- Monitoring street lights
- Structural safety

# Opportunities

---

## 2. Traffic congestion

- Adaptive traffic management
- Smart parking
- Autonomous vehicles

# Opportunities

---

## 3. Air & water quality

- Middle to low income countries most effected
- Reduced air pollution
- Water management

# Opportunities

---

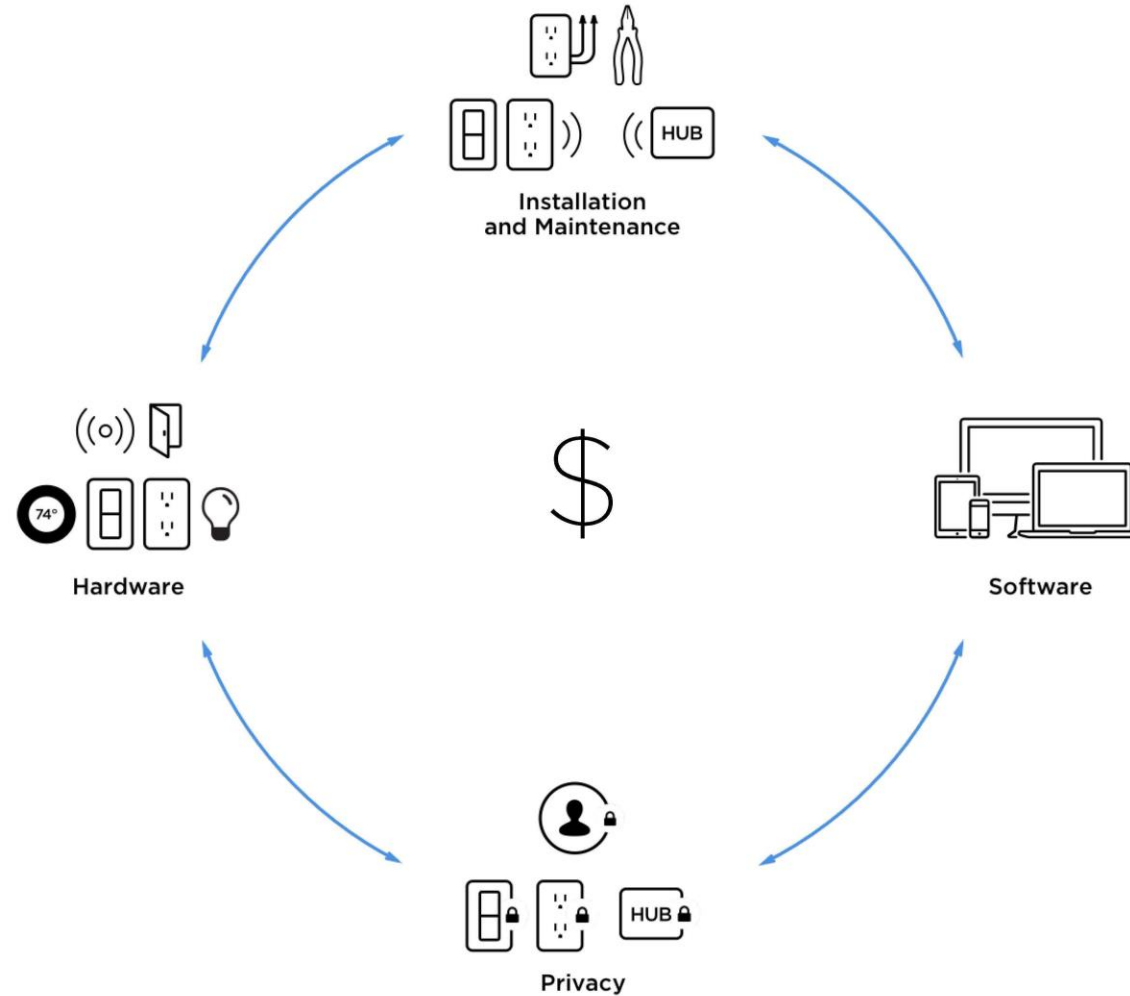

## 4. Improve quality of life

- **Lives saved by fewer traffic accidents**
- **Crime prevention**
- **Cleaner streets**

# Difficulties of IoT in the Community

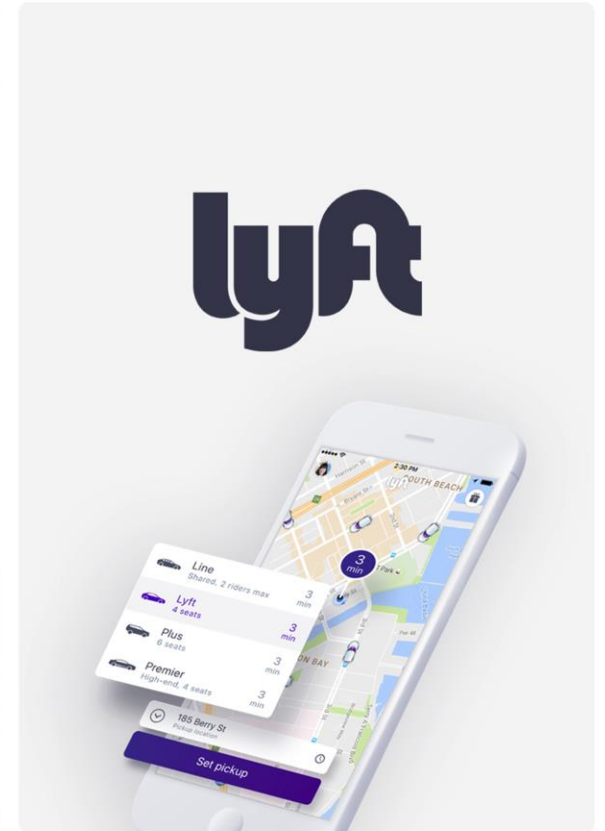

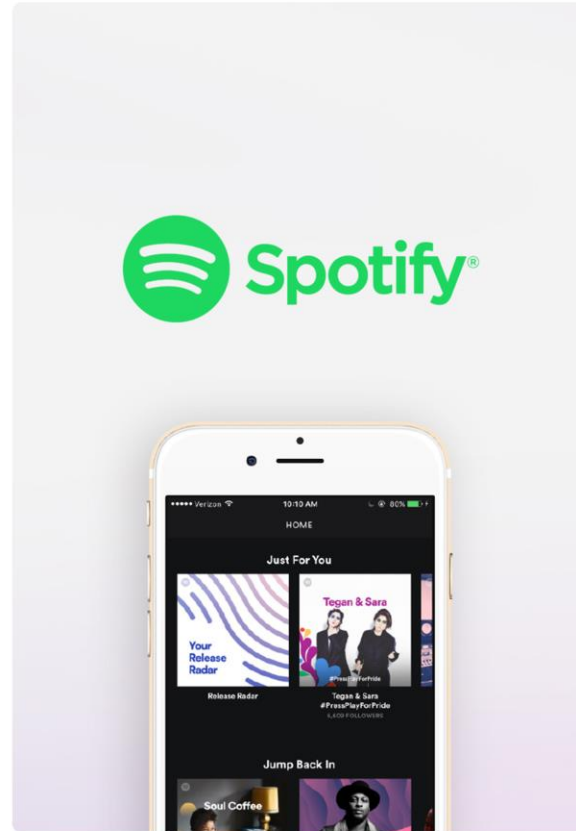

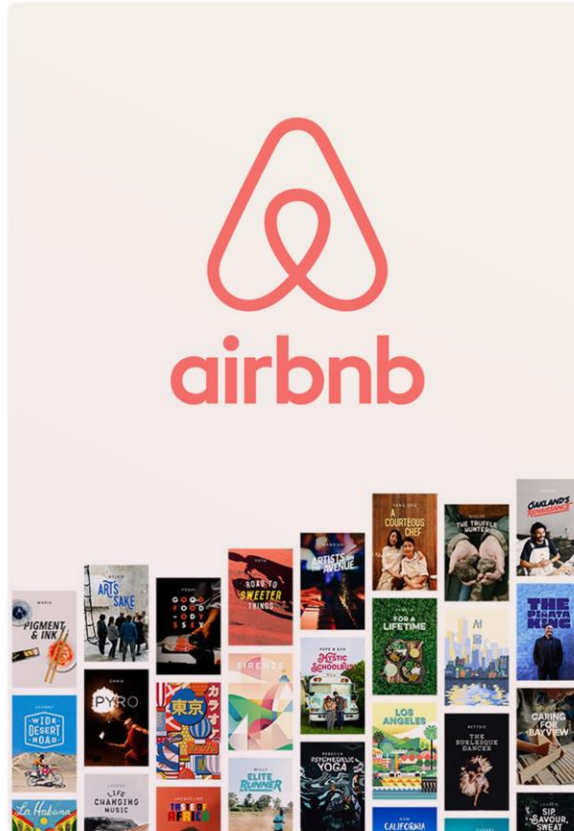

---

# IOTAS

# Access to value is more important than ownership.

# What do we do?

---

## **Smart Apartments/MFDs**

- Pre-install all hardware
- Pre-provision all devices
- Provide on going services

# How much?

---

## **27% Energy Savings per apartment**

(Based on independent 3<sup>rd</sup> party study)

**Research grant with Oregon Best to prove this out**

# IoT Automation & Data Science Opportunities

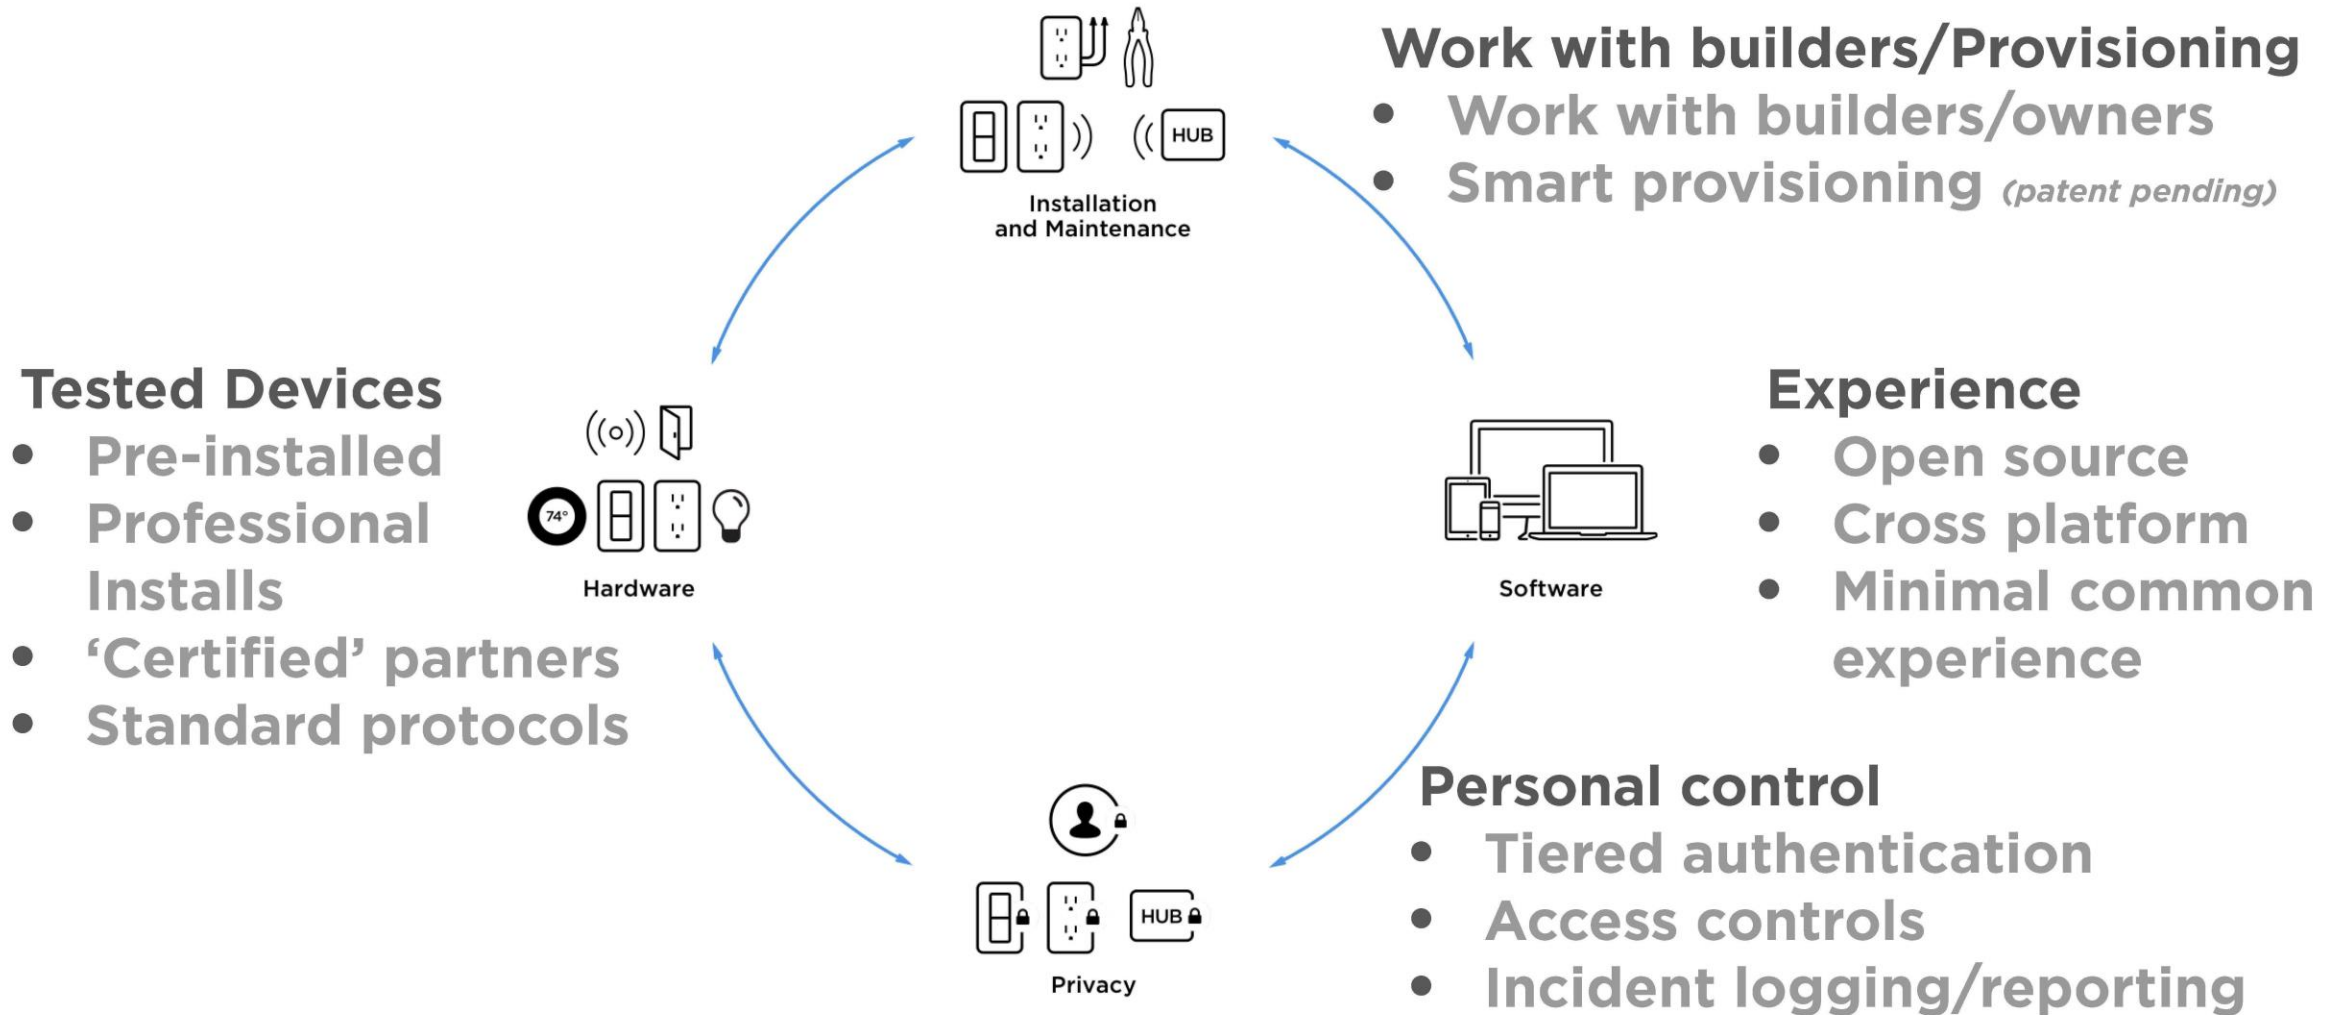

② Unit 1/1-D - ELECTRICAL  
1/4" = 1'-0" TYPE A, TYPE B

## We analyze in real time the data for continuous improvement

- Lab like controlled environment
- Minimal variables to gather data
- Entire home provides data
- Sec by sec from all connected devices
- Living Profile (lifestyle analysis)

# Revisit IoT problems

# Energy Saving Use Case

---

## **Vacant Units**

- 10% of units vacant
- Security
- Showing
- Emergency notifications

Grant Park Village

Wed. March 2nd

Sunny 61°

Potential Water Pipe Leakage  
Unit 307 - Mar. 3rd, 7:13am

Motion Sensor Alert in Vacant Unit 282  
Alert Maintenance >

Planning a Community Event?  
87% of are home on Tuesday evenings between 6pm - 8pm.

Planning Service Repairs?  
Mon thru Wed between 11am-3pm is best. Only 11% active residents.

Average indoor temp of 78 deg.  
In the last week, avg. outdoor temp decreased to 43 degrees

# The future

---

## **As IoT devices get more ubiquitous, how you use the generated data will be the differentiator**

- Apps and continuous improvement
- Living Profile (lifestyle analysis)
- Crowd sourced rules
- Shared profits
- AI

# We Upgrade Apartments with Apps, Data & A.I.

## Crowd Sourced Rules

- John is saving 12% on energy
- Everyone else is saving only 8%.
- Using John's Living Profile, IOTAS rolls out new rule to save everyone 12%

*"Darren, we have a new rule from your neighbor that can save you 12% on energy. Want to try it out?"*

## Public Transit 3rd Party App

IOTAS integrates with public transit to notify residents when it's time to leave to catch their train or bus.

IOTAS starts blinking the entryway lights to let Darren know he needs to leave now to catch his bus.

## Weather 3rd Party App

It's raining outside.

IOTAS starts blinking the closet lights to let Darren know he needs to wear his raincoat.
